

DisplayRx™

Talks to your customers

(your prescription is now ready)

Let DisplayRx™ talk to YOUR customers... By displaying prescriptions that are ready for pickup, pharmacists experience less disruptions, and pharmacy customers stop 'guessing' whether or not their Rx is ready, increasing work-flow and creating a more relaxing and professional environment. DisplayRx™ is a complete HIPPA compliant, professional grade [pharmacy display system](#), compatible with any size TV or monitor.

DisplayRx™ also displays advertisements. Quickly and easily load and manage ads, pictures, web pages, mp3's, or videos. The optional [advanced advertising system](#) can be easily managed at a single-site or at one corporate location for multiple chain sites. Each display screen can have it's own unique ads playing on half the display, while always displaying the "Ready Prescriptions" on the other half.
